Brightwave Technologies - 2025 Annual Report Summary

1. Company Overview

Brightwave Technologies was founded in 2014 in Austin, Texas, and builds smart-home devices sold through retail partners and direct online channels. At the end of 2025, the company employed 840 people across offices in Austin, Dublin and Singapore. The CEO is Maria Okafor and the CFO is Daniel Reyes.

2. Financial Highlights

Metric	2024	2025
Revenue	$212 million	$264 million
Gross margin	38%	41%
Operating income	$14 million	$29 million
R&D spending	$31 million	$40 million
Employees	710	840

Revenue grew 24.5 percent year over year, driven mainly by the AuraTemp T200 smart thermostat, which launched in March 2025 and contributed $58 million in its first nine months. Gross margin improved by three percentage points thanks to lower component costs and a shift toward direct online sales.

3. Regional Performance

North America remained the largest market, generating 62 percent of 2025 revenue. Europe contributed 25 percent, led by Ireland and Germany. Asia-Pacific contributed the remaining 13 percent, with Singapore the fastest-growing country at 48 percent year-over-year growth.

4. Product Strategy

In 2026 Brightwave plans to launch the AuraTemp T300, which will add support for 5 GHz Wi-Fi and a built-in air-quality sensor. The company also plans to open a third manufacturing partnership in Vietnam to reduce dependence on a single supplier, which currently accounts for 70 percent of production.

The R&D; team grew from 120 to 165 engineers during 2025. The company filed 9 new patents, mostly related to energy-saving scheduling algorithms used in Eco mode.

5. Risks and Outlook

Key risks include component supply shortages, currency fluctuations in Europe and Asia, and increasing competition from large technology companies entering the smart-home market. Management expects 2026 revenue of $300 to $320 million, and plans to hire roughly 100 additional employees, mostly in engineering and customer support.

Customer support satisfaction reached 91 percent in 2025, up from 86 percent in 2024, after the company introduced phone support hours from Monday to Friday. The company targets 94 percent by the end of 2026.
